To work toward efficient, appropriate technology to help develop simple solutions to everyday problems.

EXPERIENCE

OCTOBER 2017 – PRESENT

DEVELOPER SUPPORT ENGINEER, JOHNSON CONTROLS

- Implementing and updating developer API documentation and guides to help developers better utilize the Johnson Control's Digital Vault.
- Working with developers, internal and external, to answer questions and teach them how to use the Johnson Control's Digital Vault to its full extent.
- Communicating with customers and our developers tracking bugs and feature requests so they are completed in a timely fashion.
- Creating demos to showcase the Johnson Control's Digital Vault like a model of a Smart Parking Lot.

JULY 2017 – PRESENT

TEACHER'S ASSISTANT VOLUNTEER AT TENOR HIGH SCHOOL, TEALS

- Helping shape students' futures and career opportunities by providing them with computational knowledge and skills they wouldn't otherwise have access to.
- Assisting Co-Teachers in teaching High School Students the basic of Computer Science using Python and SNAP! programming languages.

AUGUST 2015 – OCTOBER 2017

APPLICATIONS DEVELOPMENT ENGINEER, CBRE|ESI

- Implementing advanced building analytics software (SkySpark) using Fantom and Axon on a 4-person team.
- Building applications for SkySpark to improve our customer's experience and to streamline the process for other teams inside CBRE|ESI.
- Training end users on the SkySpark Application and CBRE|ESI's custom applications.
- Defending Web Applications Security (Sans.org Course).
